

Introducing the **Holmes** **Smart Home**

Setting the Technology Standard
for New Homes

The Holmes **Technology** Standard

Effortless entertainment, comfort and convenience, and peace of mind—all at the touch of a button, and all while saving energy and reducing your electric bills. Simplify your life by bringing all of the technology in your new Holmes Smart Home together into one complete, elegant, easy-to-use solution.

Goodnight Button

The “Goodnight” button is the ultimate technology tool. When you’re ready for bed, pressing this button secures your home and ensures your comfort and peace of mind as you rest. Your home is so intelligent that it will alert you when the “Goodnight” button has done its job:

- Garage door closed (*The single most common Utah burglary is from an open garage*)
- Front and rear doors locked
- Security system armed
- Night time lighting levels set
- Temperature adjusted

Safety and Security

You will feel secure in your new Holmes Smart Home. Exterior lights turn on automatically at dusk and off at dawn. When you open the garage door, lights turn on so you have a visible pathway from the garage to the kitchen. We’ve even included six months of free security monitoring.

Plus, we’ve integrated the security system with the rest of the house so you can arm or disarm the security system from the keypad, the Control4® Touch Screen, the included iPad or over the Internet from anywhere in the world.

Energy Efficiency That Fits You

Running the lights and climate conditioning systems when no one is home is one of the largest wastes of electricity. Not in a Holmes Smart Home. When you arm your security system to away mode, the thermostat adjusts to away settings and lights automatically turn off, ensuring your Energy Star home maximizes your energy savings by matching your lifestyle.

Plus, you can easily program your thermostat from your Control4 Touch Screen or your iPad so the thermostat can help you save the environment and reduce your expenses automatically.

iPad/Touch Screen

The iPad and Control4 Touch Screen included with your Holmes Smart Home give you complete control and with the iPad you can control everything from anywhere in your house:

- Thermostat
- Security system
- Door locks
- Lighting
- Music

iPod and Rhapsody

With two rooms of included audio, listening to music in your new Holmes Smart Home is easier than ever. Just drop your iPod on the Control4 Dock for iPod and get instant access to your entire mobile music collection anywhere in your house. Songs, playlists, everything.

Plus, we've included a thirty day subscription to Rhapsody so you've got instant access to nearly 10 million songs. Create playlists, choose a genre, or play your favorite album. No disks to buy. Ever.

You'll see improvements in virtually every area of your life with a Holmes Smart Home. Plus you'll start feeling good about being green and energy efficient with your Energy Star Certified Holmes Smart Home. Not only can you save on your utility bills, you'll help protect the earth. You'll enjoy your home, be safer, feel comfortable, live better, be energy efficient, entertain more, be happier, and be in control of your own home. Life really is better when everything works together.
